The small village of Somnathpur contains an extraordinary temple, built around 1268 A.D. by the Hoyasalas of Karnataka-one of the most prolific temple builders. Belur and Helebid are among their better-known works. While these suffered during the invasion of the 14th century, the Somnathpur temple stands more or less intact in near-original condition. The small temple captivates with the beauty and vitality of its detailed sculpture, covering almost every inch of the walls, pillars and even ceilings. It has three shikaras and stands on a star-shaped raised platform with 24 edges. The outer walls have a profusion of detailed carvings : the entire surface run over by carved plaques of stone. There were vertical panels covered by exquisite figures of God and Goddesses, with many incarnations being depicted. There were nymphs too, some carrying an ear of maize, a symbol of plenty and prosperity. The elaborate ornamentation, very characteristic of Hoyasala sculptures was a remarkable feature. On closer look-and it is worth it-the series of friezes on the outer walls revealed intricately carved caparisoned elephants, charging horsemen, stylized flowers, warriors, musicians, crocodiles and swans.
